Conveyor Chains

Quality meets price

Here's a Challenge: European conveyor chains manufactured in our dedicated plant in the industrialised east coast of China supplying a global market.

Choose Challenge conveyor chains for quality, strength and durability. We select only the best materials with accurately controlled heat treatment and use brand new CNC machines with automatic bar feeding. The result: high precision, long-lasting conveyor chains.

ISO 9001:2000 certified, Challenge employs a highly qualified team of engineers to deliver our vision for consistently high quality at competitive prices.

As specialists in the production of spin-riveted chains, we use high-grade case-hardened alloy steel pins produced on state-of-the-art European machines, giving you the best rivet on any standard chain.

Challenge not only produces the complete standard range in accordance with all DIN and ISO specifications but also offers a limitless range of special chains.

A full range of matching sprockets are available:
Any material, any heat treatment, keyed in pairs –
all special requirements considered

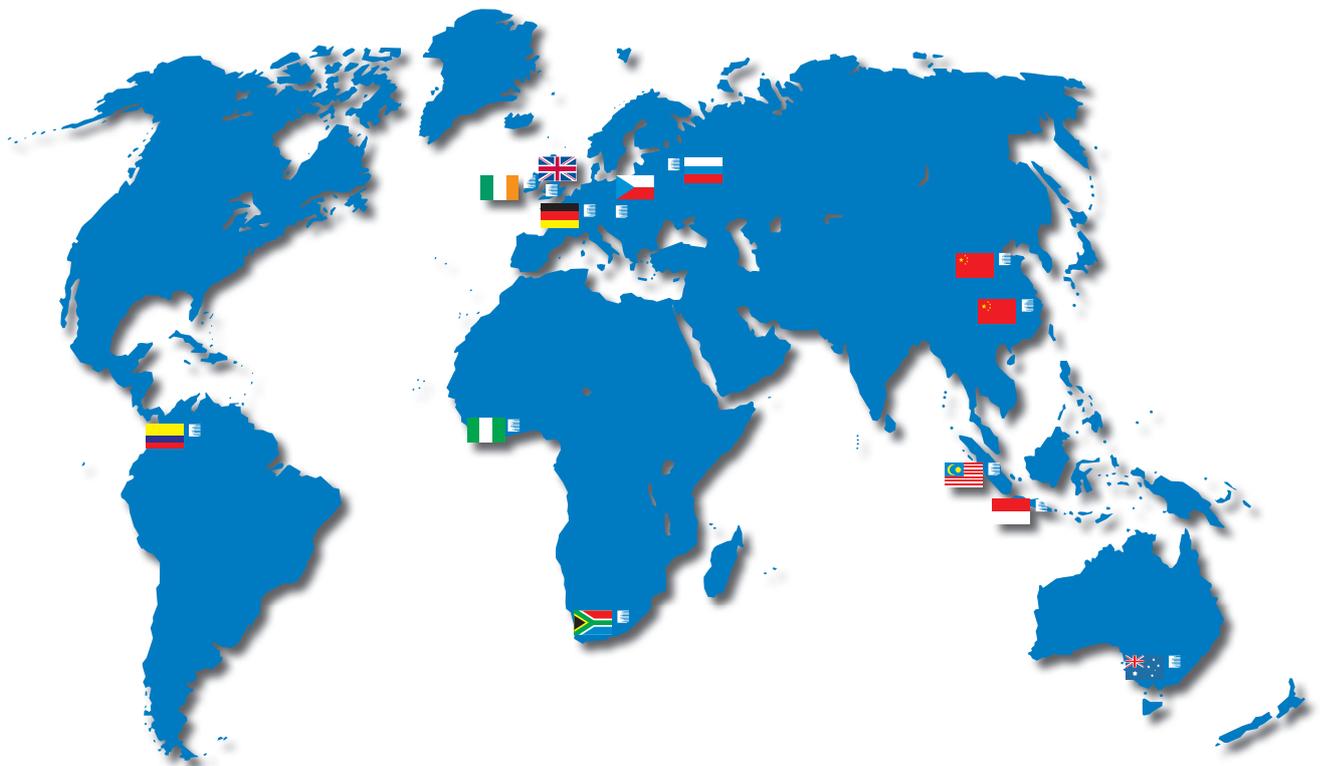

Customers in over 70 countries benefit from our technical expertise and competitive pricing. What's more, we are fast on our feet – designing and manufacturing chains for all your special projects with the impressive speed and precision we have become famous for.
